

# HOW TO INSERT ITEC WIDGETS IN SMART NOTEBOOK 11

1. Get a copy of the Widget Viewer

If you want to use the beta version, please send an e-mail to ChristianKohls@smarttech.com with an informal statement that you will not share the beta version with other teachers (except iTec teachers). The final version will be available soon.

2. Open SMART Notebook 11

3. Drag and drop, or copy and paste the Widget Viewer in a Notebook page

4. Access the iTEC Widget Store <http://wookie.eun.org/StoreClient/>  
Register or Log in

5. Select the widget that you want to use

6. Clic in Embed code

The screenshot shows the ITEC website interface. At the top left is the ITEC logo. At the top right, the user 'Ainhoa Marcos' is logged in. A search bar is present. The main content area displays the 'Butterfly' widget, which is a 'W3C Widget' about painting butterflies. It includes metadata such as 'Uploaded By: Apache Wookie (Incubating Team)', 'Type: W3C Widget', and 'Uploaded: Mon, Jul 2, 12, 12:00 AM'. On the right side, there are buttons for 'View Widget' and 'View Embed Code', with the latter being circled in red and pointed to by a red arrow. Below these are average and user ratings, and a 'Tags' section.

7. Copy the embed code

This screenshot shows the same 'Butterfly' widget page, but with a modal window open. The modal contains the text 'Use this code to embed the widget in your page' and a code block with the following HTML: 

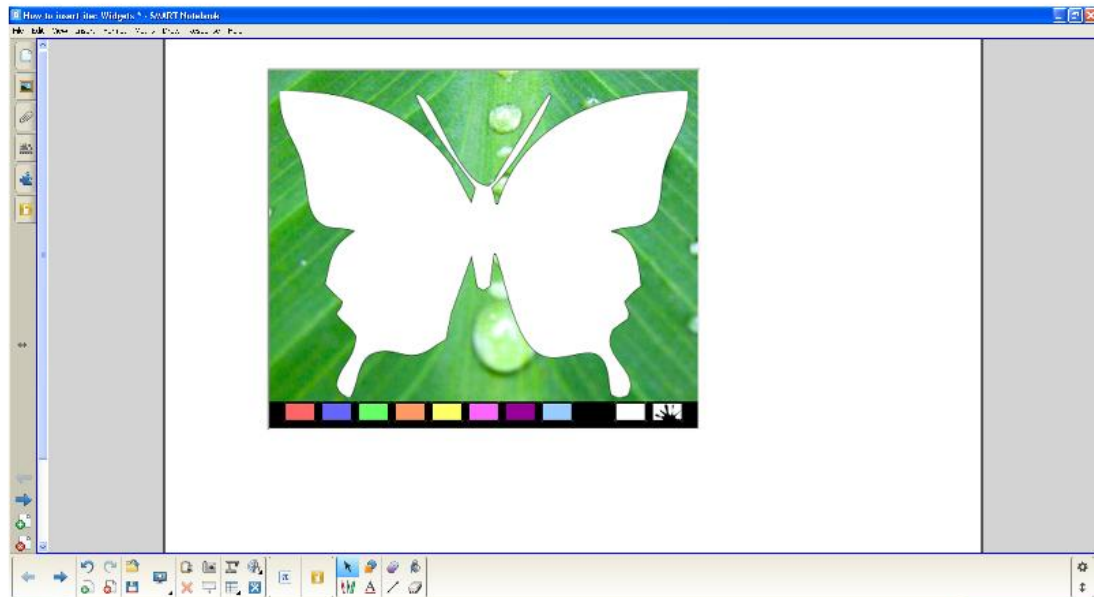

```
<iframe src="http://wookie.eun.org:80/wookie/wservices/wookie.apache.idkey=CcCAs5ex.sl.P3RWmi3qA3bMnk32t5A.eq.8proxy=http://wookie.eun.org" width="420" height="350"></iframe>
```

 The text 'COPY the code' is written in large red letters above the modal, and a red arrow points from this text to the code block. The code block is also circled in red. The background of the page is dimmed.

8. Go to Notebook 11 and paste the code into the widget viewer

9. Start using the widget in Notebook 11

**If you want to get access to the beta version please send an e-mail to [ChristianKohls@smarttech.com](mailto:ChristianKohls@smarttech.com) with an informal statement that you will not share the beta version with other teachers (except iTec teachers). The final version will be available soon.**
